PROFESSIONAL SUMMARY

Environmental Management and Toxicology undergraduate with extensive hands-on experience in environmental monitoring, pollution control, regulatory compliance, and sustainability education gained through industrial training with the Lagos State Environmental Protection Agency (LASEPA) and sustainability innovation programs. Possess strong field-based competencies in environmental sampling, laboratory support, noise pollution assessment, and regulatory inspections.

In addition to my environmental background, I bring solid technical experience as a Freelance Frontend Developer and a Professional Phone Technician, demonstrating strong analytical thinking, troubleshooting ability, technical documentation skills, and customer-focused service delivery.

I am a highly organized, adaptable, and detail-oriented individual with a strong passion for environmental protection, climate action, green innovation, and sustainable development. As a registered professional member of the Nigerian Environmental Society (NES), I remain committed to continuous professional development, ethical environmental practice, and evidence-based sustainability solutions. I am currently seeking a challenging internship or early-career opportunity where I can contribute meaningfully to sustainability-driven projects while expanding my professional capacity.

EDUCATION

Bachelor of Science (B.Sc.) – Environmental Management and Toxicology

Federal University of Agriculture, Abeokuta (FUNAAB), Ogun State

Expected Graduation: 2026

Key Academic Focus Areas:

- Environmental Toxicology
 - Water and Wastewater Quality Analysis
 - Environmental Pollution and Control
 - Environmental Impact Assessment
 - Public and Environmental Health
 - Environmental Chemistry
 - Sustainable Development and Resource Management
-

PROFESSIONAL EXPERIENCE

Phone Technician

Freecom Technology | 2021 – 2023 | Nigeria

- Diagnosed and repaired a wide range of Smartphone hardware and software faults across Android and iOS platforms.
- Performed professional repairs including screen replacements, battery replacements, charging port repairs, microphone/speaker repairs, and water-damage recovery.
- Installed, flashed, upgraded, downgraded, and restored mobile operating systems and firmware.
- Conducted systematic fault diagnostics using hardware inspection and software testing tools.
- Provided clear fault explanations, transparent repair timelines, and post-repair device maintenance guidance to clients.

- Maintained detailed repair logs, parts inventory records, warranty documentation, and customer service histories.
- Built strong customer trust through professionalism, reliability, and quality service delivery.

Freelance Frontend Developer

Internship | 2024 | Remote

- Design and develop responsive, user-friendly, and performance-optimized web and mobile application interfaces using HTML5, CSS3, JavaScript (ES6+), and React Native.
- Translate UI/UX designs into functional, scalable, and visually consistent digital products.
- Manage end-to-end project development cycles including requirement gathering, wire framing, design implementation, testing, debugging, deployment, and maintenance.
- Implement cross-browser compatibility, mobile-first design strategies, and accessibility best practices using semantic HTML and structured layouts.
- Apply version control (Git) and structured debugging methodologies to ensure clean and maintainable codebases.
- Collaborate with clients to gather feedback, implement feature upgrades, resolve technical issues, and optimize product performance.
- Provide post-deployment maintenance, troubleshooting, and optimization support.

Industrial Trainee

Lagos State Environmental Protection Agency (LASEPA) | February 2025 – July 2025 | Lagos, Nigeria

- Actively participated in routine and emergency environmental monitoring operations across industrial, commercial, and residential facilities within Lagos State.

- Conducted structured field sampling of potable water, wastewater, industrial effluents, and storm water using standard environmental sampling protocols.
- Assisted in noise pollution investigations, including sound level meter setup, calibration, readings, result documentation, and interpretation against regulatory limits.
- Supported environmental compliance inspections by documenting regulatory violations, environmental risks, safety lapses, and operational deficiencies.
- Assisted laboratory scientists in sample preparation, reagent handling, titrations, physicochemical water quality testing (pH, turbidity, conductivity, TDS), and data recording.
- Prepared detailed daily field logs, weekly technical summaries, inspection notes, and compliance documentation for regulatory reporting.
- Collaborated with environmental health officers, engineers, and field inspectors on multidisciplinary site assessments.
- Gained hands-on exposure to environmental regulations, pollution control strategies, field safety procedures, and environmental law enforcement processes.

Student Sustainability Ambassador

QAPS Sustainability Innovation Challenge | August 2025 | Lagos, Nigeria (Hybrid)

- Selected as a Student Ambassador to mentor and guide secondary school students through a complete sustainability innovation project lifecycle.
- Supported students in identifying real-life environmental challenges, developing problem statements, conducting basic environmental research, and proposing sustainable solutions.
- Guided teams on data gathering, structured documentation, proposal writing, and sustainability reporting.
- Assisted students in preparing professional project submissions, impact explanations, and short presentations.
- Coordinated weekly virtual meetings with students and supervisors to monitor progress and ensure timely project delivery.
- Prepared and submitted consolidated weekly reports to QAPS program coordinators.

- Strengthened leadership, sustainability education, public communication, project supervision, and mentorship skills.
-

PROFESSIONAL MEMBERSHIP

Member, Nigerian Environmental Society (NES) – Lagos State Chapter | June 12, 2025 – Present

Registered professional member of the Nigerian Environmental Society (NES), Nigeria's foremost environmental professional body dedicated to environmental protection, sustainability advocacy, and responsible environmental management.

As an active member of the Lagos State Chapter, I engage in:

- Professional capacity-building programs in environmental management and sustainability.
- Environmental sustainability initiatives promoting pollution control, climate action, and public environmental awareness.
- Regulatory compliance discussions focused on national environmental laws and enforcement standards.
- Professional workshops and seminars on environmental monitoring, pollution control, waste management, environmental health, and sustainable development.

This membership demonstrates my commitment to professional ethics, continuous learning, environmental stewardship, and national development through sustainable practice.

CERTIFICATIONS

Nigerian Environmental Society (NES) – Membership Certification (Lagos State Chapter); Issued: June 12, 2025

Certified professional member of the Nigerian Environmental Society (NES), officially recognized for professional involvement and participation in:

- Environmental protection and sustainability advocacy
- Environmental monitoring and regulatory compliance
- Waste management and pollution control
- Environmental health and sustainable development

KEY SKILLS AND COMPETENCIES

Environmental and Sustainability Skills

Environmental Monitoring and Regulatory Compliance | Water, Wastewater & Effluent Sampling | Noise Pollution Assessment | Pollution Control Techniques | Environmental Data Collection & Interpretation | Laboratory Sample Handling & Water Quality Analysis | Environmental Field Reporting & Documentation

Technical and Digital Skills

Frontend Development (HTML, CSS, JavaScript, React Native) | Website & Mobile App Interface Design | Performance Optimization & Debugging | Smartphone Diagnostics & Repairs | Firmware Installation & System Recovery | Technical Troubleshooting

Professional and Soft Skills

Technical Report Writing | Communication & Presentation | Project Coordination & Mentorship |
Analytical Thinking | Team Collaboration | Attention to Detail | Time Management

INTERESTS

Sustainability Innovation, Climate Action, Renewable Energy, Environmental Policy, Green
Startups, Environmental Research, Community Environmental Education
